

## THE MEN'S ROOM

### FUN PENIS FACTS

- **Smoking can shorten your penis** by as much as a centimeter. Erections are all about good blood flow. Lighting up calcifies blood vessels, stifling erectile circulation. So even if you don't care all that much about your lungs or dying young, spare the little guy.
- **Only one man in 400 is flexible enough** to give himself oral pleasure. It's estimated, however, that all 400 have given it their best shot at some point.
- **The penis that's been enjoyed by the most women** could be that of King Fatefehi of Tonga (island in S. Pacific), who supposedly deflowered 37,800 women between the years 1770 and 1784 -- that's about seven virgins a day. Go ahead, say it: It's good to be king.

### EQUAL OPPORTUNITY TOYS

- Men often come in asking "Is there anything in here for guys?". We have created a space that women feel comfortable shopping in and sometimes it throws them off. Not only do we sell toys to men and for men, most of the toys we sell can be used seeing to have a little fun or enhance their sex life.
- Most boys start masturbating without any prompting. Yet just because men don't need to be taught the basics of masturbation, doesn't mean they are loud and proud about it. Masturbation gets a bad rap in our culture no matter who is doing it. It remains the punch line of countless jokes and is dismissed as the lowest form of sexual expression.
- We are here to tell you THERE IS NO SUCH THING AS "ABNORMAL" MASTURBATION. Masturbation is just about the safest sex there is.
- Toys built specifically for men's pleasure to add variety to your solo fun!
  - Masturbation Sleeves
  - Penis Pumps
  - Cock Rings

# VelvetBox™

## 1.) Masturbation Sleeves

- Also known as “pocket pussies” in more adult typed stores
- Velvet Box avoids masturbation toys that look like women’s faces or body parts because it makes women uncomfortable and is not a huge turn on for women.
- Made of various soft materials like jelly rubber or Cyberskin.
- Lube is essential for maximum enjoyment of sleeves.

## 2.) Cock Rings

- A strip of material (fabric, leather, rubber) that a man wears to restrict blood from flowing out of his cock as he gets an erection.
- Functions as a tourniquet
- Used for an extra-stiff, super sensitive erection.
- Stay harder longer
- Can be decorative as well.
- Your cock should never get cold or numb. Remove immediately to restore circulation.
- Typically worn at the base of the genitals, or anywhere along the shaft of the penis for pleasurable pressure.
- Putting on a cock ring is simple—just secure it in the area between your genitals and the rest of your body. Your cock and balls all go in front. Drop one testicle in the ring and then the other, then push your penis through last.
- Some men say cock rings make their orgasms more intense and others claim to not be able to orgasm at all.
- Play with different styles and techniques and see how your body responds.
- Metal cock rings are for more experience users.

## 3.) Penis Pumps

- Pumps are hard plastic cylinders that fit over the penis and create a vacuum using suction.
- Meant to help a man get an erection.
- Simulates a blowjob.
- DOES NOT make your penis larger.
- TEMPORARILY makes an erection longer and wider.

# VelvetBox™

- There is no truth to people selling products that claim to permanently enlarge the penis.
- The penis is not a muscle, so any type of workout will not enlarge it permanently.
- The extra size you can get from a pump goes away with that erection.
- If you feel pain when pumping, STOP. Masturbation should never hurt.
- Never pump longer than 20 minutes at a time, and no more than a couple times a week.
- Good rule of thumb: Pump until your erection is about its usual size or only slightly bigger.

## THE PENIS IS NOT A MUSCLE

- It is simply organ tissue, like the tissue of your stomach or liver.
- The penis will not grow or shrink for excessive use or lack of use. The only growth that occurs is from the blood filling the spongy tissue upon erection.
- You can greatly damage the tissue by putting unnecessary pressure on it, such as is the case with the so called "exercises" and such devices as pumps.

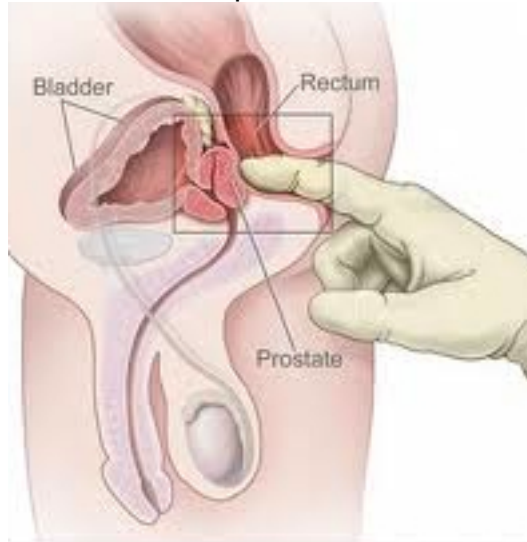

## VIBRATORS

- A man's flesh responds to vibration the same way that a woman's does.
- Feels great on nipples, shaft of penis, testicles and in and around the butt.
- Men can use most of the vibes that women use.
- Vibrating cock rings are great for couples play.

# VelvetBox™

## THE PROSTATE

- What is it? The prostate is the male version of the G-spot.

- Prostate massaging is becoming more and more popular for men of all ages, race and sexual experience.
- Can achieve better prostate health for the prostate gland.
- Prostate orgasms are typically stronger and longer lasting than a typical male orgasm.
- Silicone toys are best for anal play because they warm up to body temperature quickly and are easiest to clean.
- A man's sexuality is more than just his penis, so don't limit yourself to toys just made for the penis.
